# **SDMS – 7 +** **Driver Monitoring Status**

WOTD Group in association with SerVision

## SDMS – A Next Gen DMS

SDMS alerts drivers to dangerous situation enabling them to avoid accidents, improve performance and work more efficiently

SDMS enables fleet managers To monitor driver behaviour in real time.

# Monitoring all potentially dangerous action

Upon detecting a problem, **SDMS** triggers an alarm to the driver and acknowledges the fleet manager.

# Advanced facial recognition abilities

SDMS can store up to 20 face and identify the driver, even when the driver wearing a cap, Mask and / or sunglasses.

# SerVision Driver Monitoring Status

## DMS (driver monitoring system):

S.N	Parameters	Description	Display Screen
1	Drowsiness	Provides alarms when the driver's eyes are closed.	
2	Distracted	Provides alarms when the driver looks away.	
3	Yawning	Detects when the driver yawns. Provides alarms when the yawning continues.	
4	Smoking	Detects when the driver smokes.	
5	Driver ID detection	Stores (maximum) 20 driver IDs and identifies which driver is on board.	
6	Phone use	Provides alarms when the driver uses mobile phone while driving.	
7	Recording	Supports 3 different recording modes: Normal / G-sensor event / DSM event. Transmits real-time video via Ethernet. (ONVIF) or stores in SD card (Maximum 128G).	
8	Live video streaming	Transmit the live video through Ethernet port	

# Why SDMS

- ❖ The most comprehensive function monitoring
- ❖ Advanced facial recognition
- ❖ Real Time alarm to drivers and alerts to fleet manager
- ❖ Automatic events recording
- ❖ Modular function choice and customizable reaction time
- ❖ Multiple integration options
- ❖ Simple installation and calibration

A large blue semi-truck with a chrome grille and dual exhaust stacks is driving on a two-lane road that stretches to the horizon. The sky is a mix of blue and orange, suggesting a sunrise or sunset. The truck is in the foreground, and another smaller truck is visible in the distance.
